

Greenline 48 Fly 2018

This 2018 Greenline 480 Fly with only 350 engine hours is for now for sale. She is fitted with twin Cummins 480hp diesel engines and 4x600W photovoltaic panels, which give her a cruising speed of around 20 knots and can support fridges and freezers running constantly without the generator on. Accommodation for six guests is in 3 cabins and three heads. The massive flybridge has a large dining table and sun bed and a hydraulic swim platform provides easy access to stern. The bow and stern thrusters take the stress out of docking. Please do not wait to contact me to arrange a viewing for this special one.

HDrive Technology

Greenline are the pioneers of hybrid propulsion in boats and have used this technology since 2008. Years of experience in hybrid drivetrains have allowed us to perfect the system for not only propulsion but also maximum efficiency and comfort while living on board.

Solar Benefits Hybrid

With a bank of solar panels, you can use all of the boat’s appliances, whether cruising or at rest, without having to fire up a generator or connect to shore power. This means there is no noise, no vibrations, no emissions and no disturbing your neighbours when the boat is on anchor. Even high-load appliances like air-conditioning can be run in silence using high-performance LiPo batteries - all providing maximum comfort whether at anchor or underway.

General

Year:	2018
Price:	\$1.042,000
Additional Charges:	Plus GST, Duty & Freight
