Selene 56 Ocean Explorer A NEW ERA OF PASSAGEMAKING

Selene 56 Ocean Explorer

A NEW ERA OF PASSAGEMAKING

Inspired by feedback from the Selene owner community and blue water adventurers like the YouTube duo The 71 Percent, the new Selene 52 Ocean Explorer is the perfect marriage of capability and style.

?As part of the Ocean Explorer series, this 52-foot vessel features a more open layout, larger windows and sleeker exterior lines than a comparable Selene Classic Explorer. However, beyond the contemporary look, the Ocean Explorer maintains the performance and safety trademarks of every Selene. This includes a powerful raised pilothouse, a Portuguese bridge, and a seaworthy Class A Deep Hull designed for long-range yachting.

?Influenced by real-world cruising experiences and recent technological advancements, the Selene 52 Ocean Explorer comes standard with Selene America's most popular options, including lithium batteries, solar panels, power by Victron, Furuno electronics, CMC stabilizers, and a single powerful John Deere 6068 engine backed up by a get-home drive.

?Built around a comfortable salon and galley-down configuration, the 52 features a pair of luxury staterooms, two heads, and a surprising amount of outdoor space. Whether you want to cross oceans, cruise the coast, or live aboard in modern luxury, the Selene Ocean Explorer 52 means passage-making without compromise.
