

Semco Teak Treatment

Teak is protected by its own natural oils that migrate to the surface of the wood. The elements oxidize this oil, turning the wood grey and promoting the growth of mildew. **SEMCO Teak Sealer** contains UV protection and a mildewcide to prevent this process thus offering long lasting natural looking protection. The application lasts throughout the season and can be renewed without deep cleaning or stripping for years! Repels water without being slippery. Relieves the drudgery of constant teak maintenance.
