

Sunreef 50 Eco

This Sunreef 50 ECO is a unique all-electric catamaran, equipped with twin electric motors that enable smooth and silent cruising—ideal for navigating lagoons or remote anchorages with minimal environmental impact. At 50 feet in length, she delivers the elegance and comfort of a superyacht in a compact, easily handled format. Designed for extended bluewater passages, coastal cruising, or high-end private use, she offers an unparalleled combination of space and sustainability.

With a total living area of approximately **167 m²**, this yacht offers exceptional volume for her size. The open-plan main saloon connects seamlessly to both a forward lounging deck and an aft cockpit complete with an 8-person dining table and hydraulic swim platform. Upstairs, the

expansive flybridge includes a large table, bar, and generous sun pads, perfect for relaxing or entertaining.

She features **4 VIP double cabins**, an additional cabin with **twin bunks**, and a **dedicated crew quarter**—all finished to a high standard rarely seen on a 50-foot multihull. The layout has been carefully planned to ensure both privacy and social space, making it ideal for families who want superyacht-level amenities without managing a much larger vessel. The hydraulic platform and water toys—including a foil board, diving compressor, tanks, and a powerful 50hp tender—create the perfect setup for adventure on the water.

Inside, the galley is fitted with premium appliances, including a 4-burner induction stove, electric oven, upright refrigerator, microwave, and dishwasher. Elegant tableware, fine linens, quality upholstery, and rich wood accents create a refined atmosphere. The salon features air conditioning, a Denon sound system, a large flat-screen TV, and adjustable blinds for added comfort and privacy.

All navigation systems are conveniently located at the flybridge helm, with electric winches within arm’s reach. A forward-facing nav station inside the saloon gives quick access to the foredeck through a watertight door and allows monitoring of position and systems in total comfort.

This Sunreef 50 ECO stands alone in her class, combining silent electric propulsion with the space and finish of much larger luxury yachts. With a **2-year wait** for new builds and a **new price around €3 million (excl. VAT)**, this yacht offers a rare opportunity for immediate ownership.
